ZONE 6

Ontario's Fish Culture Program

Conserving biodiversity, enhancing fishing opportunities

The Ontario Ministry of Natural Resources and Forestry stocks approximately 8.5 million fish annually. About half are stocked into Great Lakes waters, while the rest are stocked into inland waters.

We raise and stock healthy, wild strains of native species into more than a thousand water bodies each year to help conserve and restore Ontario's aquatic biodiversity.

Wild strains of lake trout and brook trout are raised at facilities like the recently modernized Dorion facility near Thunder Bay, and the Chatsworth facility near Owen Sound to help rehabilitate local fish stocks. We are working to restore Atlantic salmon to Lake Ontario, helping to prevent the extinction of aurora trout in northeastern Ontario and developing culture practices for rare species.

We also stock fish to maintain, enhance and create angling opportunities. Walleye, chinook, rainbow trout, brown trout and splake are all prized by sport anglers. By stocking these fish, we also help conserve biodiversity by reducing angling pressure on stocks that are sensitive to over-harvest.

For more information about Ontario's fish stocking program, go to ontario.ca/fishculture. For information on where fish are stocked in the province and which waterbodies are home to which game species, go to ontario.ca/fishing and click on the Fish ON-Line tool.
