1. There are 12 youth who have had COVID-19 in Ontario, aged 12 to 17. They are in various regions of Ontario and have received the Pfizer-BioNTech vaccine. Six of these youth are female and six are male. Health Canada has recommended that the Pfizer-BioNTech vaccine be administered to youth aged 12 to 17. These individuals have received the vaccine and are now asymptomatic.

2. Additionally, 10 children aged 5 to 11 have received the Pfizer vaccine in Ontario. These individuals have received the vaccine and are now asymptomatic.

3. Pfizer-BioNTech and Moderna vaccines are currently authorized for use in Canada for individuals aged 12 to 17. The use of these vaccines in this age group is based on the availability of clinical trial data and the recommendations of health authorities.

4. The use of vaccines in this age group is based on the availability of clinical trial data and the recommendations of health authorities. The Pfizer-BioNTech vaccine is currently authorized for use in Canada for individuals aged 12 to 17. The use of this vaccine in this age group is based on the availability of clinical trial data and the recommendations of health authorities.
COVID-19 is a disease caused by a virus called SARS-CoV-2. The virus is transmitted through respiratory droplets, such as when a person speaks, coughs, or sneezes. COVID-19 can cause mild to severe illness, with some people experiencing no symptoms at all. However, in more severe cases, COVID-19 can lead to pneumonia, severe respiratory illness, and sometimes death.

5. **COVID-19 vaccines:**
   
   Pfizer-BioNTech COVID-19 vaccine is currently available.
   
   - **Dosage:** 2 doses, 4 weeks apart.
   - **Side effects:** Most common side effects are injection site reactions, pain, and redness. Less common side effects include tiredness, headache, diarrhea, muscle pain, and fever.
   - **Safety:** The vaccine has been tested in clinical trials and has been found to be safe and effective in preventing COVID-19.

6. **COVID-19 spread and prevention:**
   
   - **Transmission:** COVID-19 is primarily transmitted through respiratory droplets, such as when a person coughs, sneezes, or speaks.
   - **Prevention:** To prevent the spread of COVID-19, it is important to wear a mask, keep a physical distance of at least 2 meters from others, and wash your hands regularly.
   - **COVID-19 vaccines:** COVID-19 vaccines are an important tool in preventing the spread of the virus.

7. **COVID-19 in children:**
   
   COVID-19 vaccines are currently not recommended for children under the age of 16. However, some vaccines, such as the Pfizer-BioNTech vaccine, have been approved for use in children aged 12 and older.

8. **COVID-19 and pregnancy:**
   
   All pregnant women are encouraged to get vaccinated. The vaccines are safe and effective for pregnant women.

9. **COVID-19 and elderly:**
   
   COVID-19 vaccines are strongly recommended for people over the age of 65, as they are at higher risk of severe illness and death from COVID-19.

10. **COVID-19 and children with special needs:**
    
    Children with special needs may require additional considerations when it comes to getting vaccinated. It is important to consult with healthcare professionals to determine the best course of action.

11. **COVID-19 and the workplace:**
    
    Employers are required to provide a safe workplace and encourage their employees to get vaccinated.

12. **COVID-19 and travel:**
    
    Travelers should check the latest travel advice and requirements from their destination country before traveling. It is recommended to get vaccinated before traveling.

13. **COVID-19 and public health:**
    
    Public health measures, such as mask wearing, physical distancing, and hand hygiene, remain important strategies to prevent the spread of COVID-19.

14. **COVID-19 and international students:**
    
    International students are encouraged to get vaccinated, as they may have unique considerations when it comes to the vaccine.

15. **COVID-19 and long-term care:**
    
    Long-term care facilities are implementing strict infection control measures to protect residents and staff from COVID-19.

16. **COVID-19 and remote learning:**
    
    Remote learning is an important tool in ensuring continuity of education during the COVID-19 pandemic.

17. **COVID-19 and virtual events:**
    
    Virtual events are a safe and effective way to engage with others and continue important activities during the COVID-19 pandemic.

18. **COVID-19 and outdoor activities:**
    
    Outdoor activities, such as hiking, cycling, and picnics, can be enjoyed safely with proper precautions.

19. **COVID-19 and sports:**
    
    Sports can be played safely with proper precautions and adherence to public health guidelines.

20. **COVID-19 and travel:**
    
    Travelers should check the latest travel advice and requirements from their destination country before traveling. It is recommended to get vaccinated before traveling.
