Ontario's Fish Culture Program

Conserving biodiversity, enhancing fishing opportunities

The Ontario Ministry of Natural Resources and Forestry stocks up to 8 million fish annually. About half are stocked into Great Lakes waters, while the rest are stocked into inland waters.

We raise and stock healthy, wild strains of native species into more than 1,200 water bodies each year to help conserve and restore Ontario's aquatic biodiversity.

Wild strains of Lake Trout and Brook Trout are raised at facilities like the modernized Dorion facility near Thunder Bay and the Chatsworth facility near Owen Sound to help rehabilitate local fish stocks. We are working to restore Atlantic Salmon to Lake Ontario at the newly rebuilt Normandale facility near Simcoe, while helping to prevent the extinction of Aurora Trout in northeastern Ontario and developing culture practices for other rare species at other facilities.

We also stock fish to maintain, enhance and create angling opportunities. Walleye, Chinook, Rainbow Trout, Brown Trout and splake are all prized by sport anglers. By stocking these fish, we also help conserve biodiversity by reducing angling pressure on stocks that are sensitive to over-harvest.

For information on where fish are stocked in the province and which waterbodies are home to which game fish species, go to ontario.ca/fishonline.
