The ONRAB® Ultralite Bait is used in Ontario for both fox strain and raccoon strain rabies control. Exposure to the bait is not harmful to people or pets; however, in the unlikely event that people or pets come in contact with the vaccine contained in the bait, contacting a doctor or veterinarian as a precaution is recommended.

Bait Ingredients
The bait formula coats the blister pack containing the vaccine. This formula consists of vegetable based fats, wax, icing sugar, vegetable oil, artificial marshmallow flavour and dark-green food grade fat-soluble dye.

Ultra-lite blister-pack (Vaccine Carrier)
This is a polyvinyl chloride (PVC) blister pack (40 mm x 22 mm x 10 mm) which weighs approximately 4.3 grams. The blister pack is a white/clear polyester flocked container with a heat-sealed laminated polyester lidding. The body of the blister pack is embedded in the bait matrix but the green lidding is exposed and has a black warning label printed on it.

Inside Baits: ONRAB® oral rabies vaccine
Description: a recombinant live virus liquid vaccine
Volume/bait: 1.8 ±0.1 ml in the blister pack
Other inclusions: vaccine stabilizers
Colour: clear
Target species: skunk, fox, and raccoon
