MANIFEST AND GENERATOR REGISTRATION INFORMATION  
FOR THE YEAR OF 2015

Hazardous Waste Information Systems Unit  
Environmental Monitoring and Reporting Branch, Area M  
Ontario Ministry of the Environment and Climate Change  
135 St. Clair Avenue West  
Toronto, ON M4V 1P5

**PUBLIC INFORMATION DATASET**

## INTRODUCTION:

The Public Information Dataset contains data summarized by calendar year about the Generators, Carriers and Receivers of hazardous and liquid industrial waste as defined by Regulation 347 under the Ontario Environmental Protection Act. The data extracted from the Hazardous Waste Information Systems comes from:

- a. Generator registration process under Regulation 347.
- b. Ministry of the Environment and Climate Change Environmental Compliance Approvals (ECAs) for waste management systems (Carriers) and waste disposal sites (Receivers).
- c. Manifests that have been submitted to the Ministry to document the transfer of subject waste as defined under Regulation 347.

The Public Information Dataset has been created to permit relevant data to be accessed by the public. This dataset is lent to the public for their use.

This new set of data is available for direct download from the Ministry of the Environment and Climate Change data downloads page in MDB format.

## GENERAL CONTENTS:

The Public Information Dataset contains the following information:

- a. **2015\_GENERATOR\_INFO** – Lists generator contact and site information for generators that were registered in the Hazardous Waste Information Network (HWIN) system during the calendar year
- b. **2015\_GENERATOR\_WASTE\_INFO** – Lists waste class codes, characterizations, and physical states of wastes registered by the generator during the calendar year.
- c. **2015\_CARRIER\_INFO** – Lists contact and site information for carriers that had an active Environmental Compliance Approval (ECA) that was registered in the Hazardous Waste Information Network (HWIN) during the calendar year.
- d. **2015\_CARRIER\_WASTE\_INFO** – Lists waste class codes, as they appear on their Environmental Compliance Approval (ECA)
- e. **2015\_RECEIVER\_INFO** – Lists receiver contact and site information for receivers that had an active Environmental Compliance Approval (ECA) that was registered in the Hazardous Waste Information Network (HWIN) during the calendar year
- f. **2015\_RECEIVER\_WASTE\_INFO** – Lists waste class codes, as they appear on their Environmental Compliance Approval (ECA)

- g. **2015\_GENERATOR\_MANIFEST** – Lists quantity of waste shipped by a generator, grouped by: waste class code, characterization, receiver type, receiver district
- h. **2015\_CARRIER\_MANIFEST** – Lists quantity of waste transported by the carrier and is grouped by waste class code.
- i. **2015\_RECEIVER\_MANIFEST** – Lists quantity of waste received at a receiver site grouped by, waste class code, characterization, generator district, and generator NAICS code 1.
- j. **COUNTY\_LOOKUP** – County names matched to county codes found in other tables
- k. **DISTRICT\_LOOKUP** – District names matched to MOECC district codes found in other tables
- l. **RECEIVER\_LOOKUP** – Receiver type description matched to receiver type codes found in other tables
- m. **REGION\_LOOKUP** – MOECC Region names matched to region codes found in other tables
- n. **WASTE\_CHARACTERISTIC\_LOOKUP** – Waste characterization name based on one letter code found in other tables
- o. **WASTE\_CODE\_LOOKUP** – Waste class name based on waste class codes found in other tables

**Note:** For clarity purposes, definitions for data tables provided above are more comprehensive as compared to previous years; however, data content hasn't changed.

#### **DATA STRUCTURE & SYSTEM REQUIREMENTS:**

All the data files are in MS Access structure and can be used directly by any database management system that can understand MDB files.
