

# Metadata: Lake Partner Program (LPP)

<b>Title</b>	Lake Partner Program (LPP)
<b>Abstract</b>	The Ontario Lake Partner Program (LPP) provides total phosphorus, water clarity, calcium, and chloride concentrations data for Ontario's inland lakes. The data is collected annually through volunteer monitoring efforts, known as citizen science.
<b>Purpose</b>	To compile and store total phosphorus, calcium, water clarity, and chloride data for several hundred lakes across Ontario, predominantly on the Precambrian Shield and to track changes in these measures over time. Engaging citizen volunteers to take measurements and collect samples expands the geographic area monitored and fosters public interest in Ontario's water quality.
<b>Status</b>	Ongoing
